

STAGE 2: FIELD WORK

- **STAGE 2: FIELD WORK**

Students will be sent to their accommodation or site of study by university's vehicle. The field work should be completed in 2 weeks time. The progress of work will be assessed by program supervisor on the 2nd week on site

On site, students are required to do a complete drawing of a selected building and report on the case study and also collecting data on the historical background, information on social and culture related to the case study and details of physical and technical of the case study.

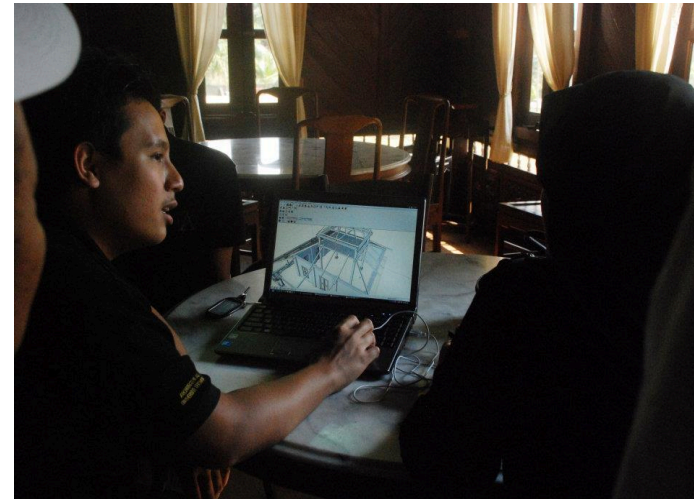

Attendance is compulsory to all students for field work on the appointed dates.

Students documenting the building on site

The progress of work will be assessed by program supervisor on the 2nd week on site

Students getting feedback from the community at the end of field work
