

## SGG 3643 (Computer Programming III)

### Exercise #02: XML & Google Maps (10%)

Task:

1. Read thoroughly the xml content below and identify the provided tags.
2. Begin copying the XML content in HTML-Kit compiler and save it as **data.xml**.
3. By following the provided XML structure, you are required to add additional five (5) markers or POIs in the XML file using an appropriate means.
4. Display your data in the provided HTML file (sample02.html).

```
<markers>
  <marker lat="1.53225" lng="103.621802" html="&lt;b&gt;JUSCO
  Taman Universiti&lt;/b&gt;&lt;br&gt;Type: Shopping"
  label="JUSCO Taman Universiti" />
  <marker lat="1.53000" lng="103.62296" html="&lt;b&gt;Masjid
  Taman Universiti&lt;/b&gt;&lt;br&gt;Type: POI" label="Masjid
  Taman Universiti" />
  <marker lat="1.55234" lng="103.61455" html="&lt;b&gt;Pulai
  Springs Golf Resort&lt;/b&gt;&lt;br&gt;Type: Leisure"
  label="Pulai Springs Golf Resort" />

</markers>
```
